OBJECTIVE

Software Engineer with 1 year of experience in Java, seeking full-time Java Developer roles.

EDUCATION

Bachelor of Software Engineer, Belarussian State University   2020 − 2024

Self-education of Java at books, video courses, pet projects.

SKILLS

Technical Skills	Java, Spring Framework, Spring Security, Hibernate, REST, SQL, C++, Python, HTML
Soft Skills	Perseverance, persevere in difficult situations, sociability, willingness to learn
Language skills	English B1, French A1

EXPERIENCE

Programmer   Jun 2022 - Aug 2022
Epam   *Minsk, Belarus*

- Developed knowledge of Java language which gave me a good boost in my subsequent studies.

Programmer   Dec 2023 - March 2024
BeSmart   *Minsk, Belarus*

- Developed REST API of the bank for making payments, using Spring Security and authentication through JWT.
- Achieved understanding of building REST API, bank transfer schemes.

PROJECTS

Banking. REST API and console application for a bank. First allows business customers to send transaction information and user confirmation of the transaction. Console application allows to authenticate in the system, change authentication data, create accounts and transfer funds between accounts, both own and other people's accounts. Transaction to another bank's account is secured taking into account work in multithreaded environment. There is also the functionality to generate a statement for the month, year or the whole period of account existence in pdf or txt format. There is a functionality of account replenishment in "ATM" and withdrawal of money from the account. After each transaction a cheque is generated and placed in the check folder in the project root. Statements are placed in the excerpt folder. The code contains documentation in JavaDoc format. (Link)

Library. CRUD A web application for digital book registration. The librarian is able to register readers, issue books to them and release books. A book can belong to only one person, a person can have many books on hand. The list of books can be displayed in sorted form, also search for books by initial letters of the book title is available. Books with overdue returns are automatically marked. The project is written using Hibernate and SpringJPA. (Link)

EXTRA-CURRICULAR ACTIVITIES

- I'm interested in philosophy, participated in a university conference.
- I also do exercise, go to the gym. In general, I like healthy lifestyle.
